

# EXPLORE CARIBBEAN AREA

Typically, the Caribbean is associated with beautiful white beaches and the sea, but this large area of the earth also offers many other attractions that add value to vacations, such as, seeing two mysterious ghost towns built by gold prospectors, visiting an island inhabited by pigs to swim and feed them, admire two pink sand beaches, step back in time by visiting old colonial-era forts and rock art left by Amerindians and Arawakans, and stay in places frequented by famous families such as Rockefellers and Fords . All of this is complemented by virgin, wild and unspoilt countryside with great food and cheerful people.
