

EXPLORE ICELAND

This remote island is able to offer exciting attractions, especially from a naturalistic point of view. Visit the largest amount of basaltic rock columns in the country with a beautifully colored glacial river flowing through a canyon, feel the thrill of walking between the boundaries of the Eurasian and North American tectonic plates, enter the magical environment of mountains, colorful rhyolite hues of green, pink and red with natural hot springs and hiking trails, soak in a geothermal pool with fantastic basalt rock formations and spectacular views of the surrounding sea, see a spectacular remote red sand beach with a suggestive surrounding panorama, relive the history of the ancient Vikings in a reconstruction of a typical village and finally contemplate the midnight sun, aurora borealis and the extraordinary power of the geysers.
